in partnership with Contra Costa County Fire Protection District, El Cerrito Fire Department, Moraga-Orinda Fire District & San Ramon Valley Fire Protection District

When: Tuesday, February 10, 2009, 8:00 a.m.

Where: Hillside Clubhouse, 3400 Golden Rain Road, Rossmoor, Walnut Creek, 94595

Cost: *FREE!* Registration required. Light lunch included. Space is limited.

Call 925-941-3673

Each year, more than 10,000 property owners in Contra Costa County are notified that they are in a Priority Hazard Zone, and they are at risk for a wildland-urban interface fire that could destroy their homes. Homeowners frequently contact the local Fire District to get a list of contractors who can do the landscaping work required to reduce their risk.

In this one-day workshop, landscape contractors and related business owners will learn the new defensible space standards set by the California State Legislature in 2008, and how to do the work to meet the State standards and jurisdiction specific standards in the various fire districts in Contra Costa County.

This two-part workshop includes 2 hours of classroom instruction, 3 hours of supervised, hands-on field work and light refreshments. The 2-hour morning session covers wildland fire basics, background, and important features of the defensible space standards. Then the group will break into work crews and transport themselves, their tools and equipment to a number of work sites selected by the Fire District. A qualified instructor will supervise each work crew in hands-on application of the standards to real property.

Those who complete the workshop will receive:

A Certificate of Attendance

- Listing on the Defensible Space Contractor referral list
- Fire District standards for defensible space in each of the sponsoring agencies
- Full color, illustrated Defensible Space brochure
