C. UPDATE: Development of Weed Abatement Appeal Process

D. UPDATES: PG&E PSPS; Antioch Development; Helicopter Program

**PSPS** is not a new PG&E program, but it will have a new use this year. Due to fires for which they were responsible, PG&E will shut off power when certain thresholds are met. The drivers are wind, humidity, and temperature. They will likely be more aggressive with initiating shutoffs which will include high tension lines. Affected communities may not be near an actual weather event. The new use of this program is a significant change and poses potentially substantial issues for the Fire District and other services such as buses, hospitals, and police. More work needs to be done with regard to this program.

Last weekend, PG&E communicated with us beforehand and told us to expect two to five day shut off periods because they must perform inspections before restoring power. Generators are good but present safety issues if not installed properly. Not all of our stations have generators, but the District intends to make our stations as robust as possible. We recently purchased a 150-watt generator that can be placed on a trailer and will mainly be used for the Communications Center. The District plans to brief the Board of Directors in July.

**Antioch** has been trying for a few years to get a Mello Roos CFD endorsed for new development. The District was candid with them about their new eleven three-story building project being unsafe. The District will present a report on the new Development Impact Fee to the Board of Directors on July 9. We are also working on how to fund the cost of a new fire station (#89) near the Antioch Kaiser facility.

**Helicopter** Program update is being moved to the next Commission meeting.
